WORK EXPERIENCE

Senior AI Engineer, Global IS Team

TRENDMICRO | TAIPEI, TAIWAN

> *Driving Agentic AI Applications for Hyperautomation*

Agentic Workflows

Architected and deployed a highly reliable, cross-regional intelligent customer service workflow using LangGraph, FastAPI, and Azure service to ensure operational scalability.

FastMCP Toolchain

Developed the FastMCP toolchain leveraging FastAPI and Docker to optimize content processing latency and markedly increase response accuracy via internal MCP-Server integration.

D365 CRM Automation

Led collaboration with the CRM Team to automate repetitive internal workflows, substantially reducing manual intervention time.

Resource Management

Spearheaded R&D via POCs to improve bot accuracy and strategically control LLM Token consumption costs.

Technical Evangelism

Championed internal technology adoption through sharing sessions and initiated engineering workshops for the future AI technology roadmap.

Principal RD Engineer

TPISOFTWARE |

> *Led the algorithm team for systalk.VIKI (Enterprise GenAI Assistant)*

LLM Fine-tuning

Technical lead for LLM parameters optimization. Proposed a two-stage Supervised Fine-Tuning (SFT) methodology for Breeze 7B and Llama 3.1 models.

Dataset Engineering

Developed asynchronous general financial knowledge and instruction datasets using Langchain and LangGraph via a Multi-LLM Agent platform.

Infrastructure

Directed building of a model training platform based on Huggingface and Pytorch, incorporating DVC and MLflow for tracking.

Management

Supervised technical interns in creating a training dataset management platform utilizing Django Rest Framework, MongoDB, and OpenSearch.

Prompt Lab & Pre-sales

Established internal Prompt Lab and demo sites, improving success rates of external AI pre-sales engagements.

Strategy Implementation

Shared prompt optimization strategies (CoT, ReAct, Reflexion) and encouraged development of internal OPRO tools using DSPy.

VIKI LLM Server

Developed server using DRF, OpenAI SDK, and PostgreSQL; standardized internal model API interfaces.

Senior RD Engineer

TPISOFTWARE |

> *Senior Algorithm Engineer at systalk.AI Algorithm Team*

Product MVP

Contributed to the planning and development of LLM products from the ground up, including the establishment of systalk.VIKI.

RAG & Validation

Developed RAG knowledge base assistant and Systalk.LAB prompt engineering tool for rapid validation of cloud/on-premise platforms.

CV/OCR Pipeline

Developed OCR model training pipeline using Pytorch (Transformer architecture) for Systalk.ICR.

Internal SDKs

Built internal packages (Systalk-ai-core, nlp, vision) referencing DAG algorithms and Pytorch pipelines to reduce development costs.

Client Solutions

Developed text mining APIs for a life insurance client to optimize medical insurance form proofreading processes.

Product Optimization

Optimized the existing conversational NLP customer service product, Systalk.Chat.

NLP RD Engineer

ELAND INFORMATION CO., LTD. |

Model Development

NLP machine learning and deep learning models tuning and development.

MLOps

Responsible for product planning, development and deployment of MLOps web API and user interface.

Documentation

Maintained user manuals and software documentation.

INTERNSHIP EXPERIENCE

Assistant Data Analyst

Raphael Clinic

Data Analysis: Assisted in collecting and analyzing complex data to create project insight reports.

Strategic Advice: Provided strategic advice on marketing and digital activities to managers.

Internal Training: Assisted in the establishment of internal training materials.

Summer Intern

Taiwan Intellectual Property Office

Promotion: Organized exhibitions and activities to promote information and documents.

Cataloging: Responsible for cataloging, filing, and organizing new data.

TECHNICAL SKILLS

Generative AI & LLM

LangGraph | Langchain | LangFlow | Prompt/Context Engineering | LLM Fine-tuning (SFT) | RAG | Agentic Workflows | Huggingface | Breeze/Llama/Gemma

Engineering & Frameworks

Python | PyTorch | FastAPI | Django REST Framework | Scikit Learn | OpenCV | Streamlit | PostgreSQL | MongoDB

Infrastructure & MLOps

Docker & Compose | vLLM | DVC | MLflow | OpenSearch

Tools & Productivity

Claude Code | GitHub Copilot | Notion | Git/GitLab | GitHub Projects

EDUCATION

Taipei Medical University — 2019 – 2021
Graduate Institute of Data Science

National Taiwan University — 2014 – 2018
Library and Information Science

LANGUAGES

English	ADVANCED
Chinese	NATIVE
Japanese	INTERMEDIATE
